OBJECTIVE

Highly skilled Network Engineer and IT support with 6+ years of experience in designing, implementing, and managing network infrastructures. Proven expertise in network security, LAN/WAN design, and troubleshooting. Seeking a challenging role to optimize IT environments and deliver robust, scalable solutions.

EXPERIENCE

GroundhogApps Pvt Ltd – Network and Infrastructure Admin

June 2025 – Present

- Managing Ubiquiti wireless access points including U7 sector antennas, point-to-point (PtP) communication using PBE devices, and mesh network deployments for the mining site infrastructure.
- Deploying and managing AWS services including App Runner, ECR, CloudFront, S3, and Secrets Manager for application hosting and infrastructure automation.
- Administering AWS Route 53 for domain name management and DNS configuration across the organization.
- Configuring and maintaining Sophos Firewall for network perimeter security, traffic filtering, and access control policies.
- Administering Microsoft Entra ID (Azure AD) for user account lifecycle management, access control, group policies, and identity governance across the organization.
- Integrating and managing diverse IoT devices including GPS trackers, Teltonika devices, CAN data reading devices, and OBD devices for mining fleet and equipment monitoring.
- Managing IT assets through the Keka platform and overseeing AWS billing and cost optimization for cloud services.
- Maintaining Groundhog network infrastructure and ensuring high availability of all network and communication systems.

Value Point Systems Pvt Ltd – Network Engineer

Nov 2023 – May 2025

- Managed network infrastructure for 91 Spring Board across 2 hubs and successfully configured new network setup for the 3rd hub at Raheja H Block, ensuring continuous and efficient network performance.
- Resolved network and connectivity issues, minimizing downtime, and efficiently managed IT support requests via the Zoho ticketing tool.
- Configured firewall rules, NAT, and service ports to ensure a secure, optimized network. Managed ARP protocols for IP bindings, strengthening network security.
- Maintained and configured routers, switches, and wireless access points for reliable connectivity. Used the PRTG tool for proactive network monitoring.
- Configured routers via Winbox to ensure optimal performance and network stability. Managed protocols such as DNS, DHCP, MPLS, FTP, STP, and AS2 for seamless network operations.
- Maintained and monitored the surveillance system, including NVRs, ensuring both live and backup view functionalities are operating effectively.

Efftronics Systems Pvt. Ltd – System Administrator

Feb 2020 – Aug 2023

- Managed the Divisional Railway Manager (DRM) office network, ensuring continuous and reliable connectivity across all railway systems.
- Provided technical support for hardware, software, and network-related issues; troubleshooted and resolved system, application, and connectivity problems.
- Installed, configured, and maintained software and hardware systems; performed regular system updates, backups, and patch management.
- Configured databases for both existing and new railway systems, ensuring seamless integration and optimal performance.
- Performed fault analysis and XML simulation analysis to identify and address potential issues in railway product performance.

- Managed Oracle user creation and conducted preventive maintenance focusing on data backups for critical railway applications.
- Oversaw the upkeep of CMUs, servers, FEPs, and test room equipment essential for railway signaling and communication.

V Square Security Systems – Network Engineer

April 2019 – Jan 2020

- Configured switch VLANs, routers, and switches for reliable connectivity; resolved LAN and WAN issues promptly.
- Installed and configured Windows Server, managing domains and user accounts to optimize network performance.
- Executed IP addressing and subnetting to enhance network organization and efficiency.
- Installed DVRs, NVRs, and troubleshoot CCTV network issues to ensure optimal security and performance.

Avantel Ltd – RF Test Engineer

March 2018 – April 2019

- Conducted unit-level, module-level, and PCB-level testing for RF Power Amplifiers to ensure performance and reliability.
- Performed functional tests on developed modules during Environmental Stress Screening (ESS), including thermal and random vibration tests.
- Liaised with clients to discuss and implement modifications related to circuit and PCB design.

EDUCATION

B.Tech (ECE) – Pydah Kaushik College of Engineering, Visakhapatnam *2013 – 2016*

Diploma (ECE) – Sai Ganapathi Polytechnic College, Visakhapatnam *2010 – 2013* SSC

– GTW Boys High School, Panasalapalam *2010*

TECHNICAL SKILLS

Networking: CCNA – Static, RIP, EIGRP, OSPF, BGP, VLAN, STP; Protocols: SSH, SFTP, FTP, TFTP

Wireless: Ubiquiti (U7 Sector, PBE PtP, Mesh), Ruckus Virtual Smart Zone

Firewalls: Palo Alto, Sophos

Cloud (AWS): App Runner, ECR, CloudFront, S3, Secrets Manager, Route 53, Billing & Cost Management

Identity Management: Microsoft Entra ID (Azure AD), Active Directory, Domain Controller

IoT Devices: GPS Trackers, Teltonika, CAN Data Readers, OBD Devices

Monitoring & Tools: PRTG, Winbox, Zoho Ticketing, Jira Ticketing, Keka IT Assets

Database: Oracle, SQL

Other: MS Office, Linux Administration, DevOps

STRENGTHS

- Works diligently and effectively under challenging circumstances.
- Strong understanding and analytical ability across network and infrastructure domains.
- Consistently delivers assigned tasks on time with accuracy.

DECLARATION

I hereby affirm that the information provided above is true and accurate to the best of my knowledge and belief.
